Visits were made at San Diego as well as San Francisco.

Germany Desires Peace With U. S.

Torpedoing of the Lusitania is No Stain. No Peace is Possible With Great Britain

Berlin, Sept. 6.—The Vossische Zeitung devotes three columns to discussion of the situation as regards Germany and the United States under the heading:

"The Agreement with America." After impliedly expressing dissatisfaction at the message conveyed by Ambassador von Bernstorff to the Washington authorities, it declares:

"Complete unanimity reigns in Germany in the wish to maintain unaltered peace between Berlin and Washington. Ambassador von Bernstorff's explanation must not be taken either as an admission of any guilt in past procedures or as an indication of fear or weakness.

"It must be reiterated that the torpedoing of the Lusitania, no matter how lamentable from a humanitarian standpoint, left no stain upon Germany's honor. The same holds true for the Arabic. If it ever becomes possible to clear up this case through unobjectionable evidence it will be shown that the captain of the Arabic himself was guilty of his fate and that of his passengers.

"It must also be specifically pointed out that submarine warfare against merchant vessels will now as formerly be carried on.

Restrictions on Admissions
"Our admissions to America have restrictions. Our agreement counts only in case British passenger steamers do not try to harm our submarines. If Great Britain in the future believes it will be possible to deal lightly with the lives of American citizens, she will have to bear the consequences as before.

"Through our step we have proved to Americans in the most loyal way how highly we value the relations existing between them and us. It is surely known in leading circles in the United States that even a declaration of war by America against Germany could no longer do real harm to the German cause.

"The British press is attempting to alter the case to make it appear that Germany's move was made with an intention to win the American president as peace agent. We do not know whether President Wilson has this thought. Likewise we cannot prevent the pope through Cardinal Gibbons, from expressing his peace desires to the president. We highly respect the humanitarian basis of this but we would not like to leave any uncertainty concerning the fact that Germany does not even consider concluding peace through any agent whatever. He who wants peace with us may come to us himself."

The editorial concludes with the declaration that peace is possible every opponent of Germany except Great Britain which forced on us the difficult task of conducting a world war. We, however, wish first a decision and then a peace which shall accord with this decision.

DR. DUMBA EXPLAINS LETTER

Washington, Sept. 7.—Dr. Constantin Dumba, the Austro-Hungarian minister, laid before Secretary Lansing today an explanation of a letter written by him to the Vienna foreign office discussing plans for withdrawing Austro-Hungarian labor from American plants making war supplies for Great Britain and her allies.

Neither the ambassador nor Mr. Lansing would comment upon the interview when it was over. The impression prevailed in official quarters however, that the secretary would submit the matter to President Wilson with whom would rest the decision as to whether the explanation was satisfactory.

The text of Dr. Dumba's letter, recently seized by British authorities from its bearer James F. J. Alexander, an American was cabled to the state department early today by Ambassador Page at London and had been the subject of a conference between the President and Secretary Lansing before the ambassador reached the department. It is understood that the use of an American passport to shield the messenger who carried not only the Dumba letter, but dis-

patches from the German embassy and other documents, was regarded by them as quite as serious a matter as the activities revealed by the letter itself.

Gives Negative Response

Mr. Lansing's only statement on the subject was a negative response when asked whether any steps had been taken toward bringing the situation to the attention of the Austro-Hungarian foreign office.

From reliable sources it was learned tonight that Dr. Dumba in making his explanation, outlined the Austro-Hungarian view of the plans dealt with in his letter, contending that it contemplated no violation of the laws of the United States. So far it was said no steps had been taken but the ambassador had been instructed to give widest publicity to a new decree of his government making nationals liable under martial law for rendering assistance in the manufacture of munitions of war for the enemy. This decree previously announced provides punishment of long terms of imprisonment and even death by hanging for Austro-Hungarians committing the offense at home or abroad. Cooperation in carrying out the purposes of the law, it was pointed out, was held to be mere fulfillment of the duty of an ambassador charged with protection of his nationals. It was not denied, however, that Austria-Hungary's representatives while they had no desire to injure American interests would not hesitate to handicap in any way possible the efforts of their enemies to obtain munitions.
